Education and Major Courses

★*School of Information Engineering, Nanjing Xiaozhuang*   09/2012-07/2016
University

B.S of Computer Science; Major: Software Engineering

Key major courses:

- ◆Programming in C Language
- ◆Programming of Linux OperatingSystem
- ◆Principles of Computer Composition
- ◆Java Program Design
- ◆Data Structure and Algorithms
- ◆Program in C# ◆Operating System
- ◆Oracle Database Technology
- ◆Database Principles ◆Computer Networks
- ◆Fundamentals of Compiling
- ◆Software Testing and Quality
- ◆UMLand System Modeling

★*Department of Computer Science, University of North Dakota*   08/2016 –12/2017

M.S of Computer Science

Have completed major Courses:

- ◆ Formal Languages and Automata
- ◆ Operating System I
- ◆ Advanced Software Engineering
- ◆ Electronic Commerce System
- ◆ Distributed Operating Systems
- ◆ High Performance Computing and Paradigms
- ◆ Advanced Database Systems
- ◆ Advanced Artificial Intelligence
- ◆ Data Structure, Algorithm, and Software Design with C^{++}

★*Department of Computer Science, Stevens Institute of Technology*   01/2018 –present

M.S of Computer Science

Continuing to complete major courses:

- ◆ Web Programming
- ◆ Web Programming II
- ◆ Intro ProgramData StructAlgor
- ◆ English

Award and Achievements

- 01/08/2015/, won the first prize of the third English words competitionorganized by Seashore Education.
- 2014-2015, won the second prize of professional learning and individual wards of academic progress.
- 2013-2014, won the third prize of professional learning
- 2012-2013, won the title of "Star of Monthly Work"conferred by the Council of Campus Service in Nanjing Xiaozhuang University.
- 2013-2014,Professional study Award, the Third Prize

Professional Experience

★Nanjing Xudan Information Technology Co., Ltd.   03/08/2016—04/25/2016

Assistant Intern

- Research and develop independently minitype oa system（office automation system，including user logining，registering account，inquiring user information，modifying and deleting user information and so on.
- Develop big data and cloud computation，based on Hadoop platform, data batch process.

★Jiangsu Suwei Microsoft Technology Co., Ltd.   07/01/2015-10/30/2015

Assistant Intern

- Primitively got acquainted with Android development environment（ADT+Android SDK Plug-in , and configuration of JDK environment variable, setting up development platform, with Linear Layout and Relative Layout completing high simulationmanufacture of static interface like QQdynamic page, and Alipay page. Meanwhile, functions of calling, texting, music player and calculation have been done on client-side.
- In August, under the guidance of teachers, got acquainted with most controls, and passing values between pages by binding adapter. At the same time , studying Android including:time disposal, animation production, data storage ,service, and Socketnetwork programming.
- Independently completed microblogmanagement systemin July and August, well performed in main functions, such as: lead in pages、logining registering, password modifying, microblogging, obtaining messages list and followers list、checking others' personal information and commending.

★Nanjing Keyi communication technology co., LTD   07/01/2013-08/29/2013

Assistant Intern

- In July, learned Java basic language, as well as compiling some simple programmes (sequencing) , got acquainted with three basic frameworks（Struts, Hibernate,Spring）,and assisting the company with rear service.
- In August, assisted the developer with Java Web development, which includes specific processes of logining, registering, and blacklisting non-performing assets system of rural commercial bank. Writing kinds of function pages in the front end of JSP, as well as implanting javascript, conveying Java code to the backstage supporter by service, implementing the practical methods.

Social Experience
